DETAILED ACTION

Allowable Subject Matter

- 1. Claims 12-21 are allowable.
- 2. The following is a statement of reasons for the indication of allowable subject matter:

Claims 12-21 are allowable because the prior art, particularly Reisman [U.S. Patent No. 6,594,692], Faris et al. [U.S. Patent No 6,659,861], Hong et al. [U.S. Patent No 6,563,821] and Bowman-Amuah [U.S. Patent No 6,556,659] fail to teach or suggest a system (or method) for testing the load state of at least one device in the case of a load by a plurality of users, the device being connected to a communications network based on an IP standard, the system comprising:

a plurality of script-processing devices being able to simultaneously establish mutually independent connections via the connection interfaces, to a device to be tested, Wherein each script-processing device executes at least one session script received from the control device through each of the mutually independent connection interfaces to simulate a load of a plurality of users on the device to be tested, wherein the at least one session computer logs messages generated by the execution of the at least one session script to evaluate a load state of the device to be tested.

Conclusion

Any inquiry concerning this communication or earlier
 communications from the examiner should be directed to Felix Suarez, whose

Application/Control Number: 10/049,867

Art Unit: 2857

telephone number is (571) 272-2223. The examiner can normally be reached on weekdays from 8:30 a.m. to 5:00 p.m.
